Rizki Shaumi Sabiq

+6288226539328 | rizki.shaumi.dev@gmail.com | www.linkedin.com/in/rizki-shaumi-sabiq | Garut, West Java

A motivated and technically skilled Information Technology graduate with a strong foundation in network fundamentals, system administration, and virtualization. Eager to leverage hands-on skills from academic projects and a personal home lab to contribute to an IT support or junior sysadmin role. A quick learner with a passion for problem-solving and a commitment to mastering new technologies.

Education

Semarang State Polytechnic - **Semarang, Indonesia** Sept 2021 – Sept 2025

Bachelor of Applied Engineering degree in Computer Engineering Technology, 3.64/4.00

Experiences

Dinas Komunikasi Dan Informatika Garut - **Garut, Indonesia** Jul 2024 - Dec 2024

Cyber Security & System Administrator (Internship)

- Deployed and configured virtual machines (VMs) in VMware vSphere environment as part of cloud infrastructure implementation.
- Performed system troubleshooting, performance validation, and compatibility checks to ensure seamless VM deployment and lifecycle management.
- Installed and configured pfSense firewall on a dedicated virtual machine, including interface assignment, network bridging, and rule-based traffic filtering.
- Implemented and customized Snort IDS/IPS rules to detect various scanning techniques (e.g., TCP SYN, FIN, XMAS, NULL, ACK, UDP, and OS fingerprinting attempts).
- Conducted penetration testing simulations from Kali Linux using tools such as Nmap and Metasploit to evaluate firewall performance and detection capabilities.
- Deployed and configured VMware ESXi 8 on an HPE physical server with RAID storage setup.
- Set up and optimized vCenter components including Data Center, Cluster, and Host configuration
- Implemented vMotion to support live virtual machine migration across hosts and clusters.
- Designed and configured storage infrastructure using Windows Storage Server for centralized VM data management.

Projects

IoT-Based Air Conditioner Monitoring & Prediction System (AWS) Jun 2025 - Aug 2026

- Built a cloud-based IoT system for real-time AC monitoring using Flutter (frontend) and PHP (backend).
- Deployed backend on Amazon EC2 with secure networking via Amazon VPC and security groups.
- Integrated IoT data ingestion (REST/MQTT) and stored telemetry in a relational database (RDS/MySQL).
- Implemented scheduled ML predictions in Python using Amazon EventBridge and AWS Lambda (or cron jobs) to forecast AC usage

Malware Incident Handling Jan 2026 - Jan 2026

- Doing an end-to-end incident response investigation for a server breach, successfully tracing the attack chain from initial web application compromise to container takeover.
- Identified and analyzed a cryptomining malware payload employing masquerading techniques (disguised as an immunify360 security service) and persistence mechanisms.
- Performed root cause analysis (RCA) by auditing source code, identifying a Server-Side Request Forgery (SSRF) vulnerability within Next.js API routes (route.ts) acting as the Point of Entry (PoE)
- Strengthened cloud and container security posture by implementing non-root execution policies, strict network egress rules, and remediating server-side fetch validation flaws in API routes.

Web Vulnerability Scanner Feb 2026 - March 2026

- Developed a web-based vulnerability scanning interface to streamline website security assessment and vulnerability analysis.
- Integrated OWASP ZAP to web application vulnerability scanning and identify common security issues.
- Integrated Nmap for network and service discovery, including port and service enumeration.
- Utilized SSLyze to assess SSL/TLS configurations and identify potential security weaknesses in HTTPS services.
- Designed a backend workflow to execute security scanning tools and present scan results through a centralized web interface.

AI WhatsApp Chatbot for Umrah Travel Jul 2026 - Aug 2026

- Designed and developed a WhatsApp AI chatbot for Umrah travel agencies to automate customer inquiries
- Integrated an LLM with a backend service to answer package availability, pricing, and frequently asked questions.
- Implemented API-based architecture to support real-time availability checks and future integration with booking systems

Training Program

Aws Re/Start – **Amazon Web Service** Sept 2025 – Feb 2026

Cloud computing training covering AWS core services, Linux, networking, Python scripting, and databases.

Certificates

Aws Certified Cloud Practioner Apr 2026 - Apr 2029

Validates foundational knowledge of AWS Cloud concepts, core services, security, pricing, and architecture.

MikroTik Certified Network Associate (MTCNA): MikroTik Mar 2025 - Mar 2028

Through this certification, I acquired fundamental knowledge and skills in configuring MikroTik routers and networks, laying the foundation for advanced networking expertise.

TOEIC SCORE : 920 Oct 2024 -Oct 2026

Achieving a TOEIC score of 920 demonstrates a high level of English proficiency in reading, writing, listening, and speaking, enabling effective communication and collaboration in international and remote work environments.

Skills

Technical

- OS:Kali Linux, WSL, Ubuntu, Windows Server, etc.
- Cloud & Virtualization: AWS Cloud Service, Hyper-V, Proxmox, VMware.
- Containerization: Docker.
